

# The World

What is  
Geography?

Geography is the study of the  
Earth and it's people.

<http://www.youtube.com/watch?v=CGpas-GPjvQ&feature=related>

Geographers use five themes or topics to describe places and people.

1. Movement
2. Regions
3. Location
4. Human-Environment Interaction
5. Place

# MOVEMENT

**Movement**

○ <http://www.youtube.com/watch?v=92N1kaYEYPw>

**The relationship among places; how people, goods, and ideas get from one place to another**

# MOVEMENT

## Human Movement:

People move from one place to another in cars and airplanes. Movement also deals with how and why people travel from one place to another. Some people travel for career, others to be close to family, and some move to escape war or religious persecution

## Products:

How supplies such as food and oil are transported from one area to another.

## Ideas:

How ideas are spread from one place to another.

# REGIONS

## Regions

A place with unifying characteristics, such as climate or history; used especially to make comparisons

# REGIONS

Regions refer to areas of the Earth's surface that have several common characteristics, such as:

- Political Regions
- Landform/Physical Regions
- Agricultural Regions
- Cultural Regions

# LOCATION

**Location**

**Where something is;  
includes  
absolute and  
relative  
location**

# LOCATION

Location is the position of a place on the Earth's surface. Location explains:

- Where is it?
- Why is it there?

To answer those questions geographers describe location in two ways:

1. Absolute Location
2. Relative Location

# LOCATION

◎ **Absolute Location**  
the exact spot on Earth where a geographic feature such as a city or mountain is found (latitude and longitude).

Example: Morehead City's coordinates are  $34^{\circ} 43'40''\text{N}$   $76^{\circ} 44'48''\text{W}$

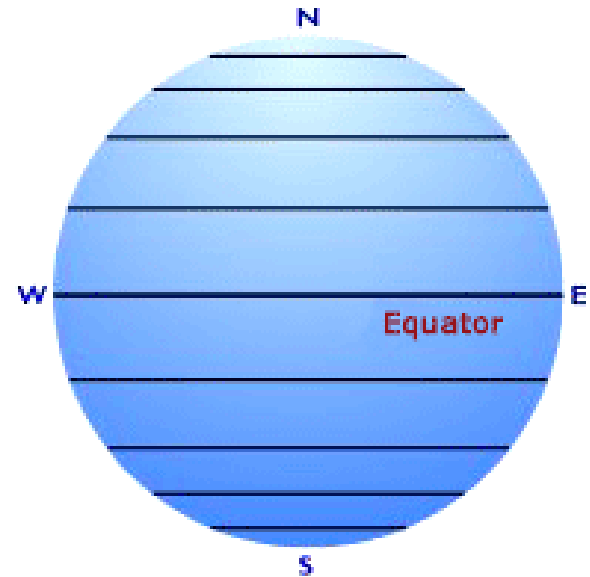

◎ **Relative Location**  
what is it near?

Example: Morehead City is near the Atlantic Ocean and Beaufort.

**Latitude:** Lines run east to west

Main line of latitude is the: **Equator**

# Longitude: Lines run north to south

Main line of longitude is the: **Prime Meridian**

# INTERACTIONS

This describes how people affect their environment. Or natural surroundings, and how their environment affects them. People affect the environment by using or changing it to meet their needs. Environmental factors that people cannot control, such as temperature and natural disasters, influence how people live.

# PLACE

# PLACE

**Physical Characteristics:**  
describes the environment of a place.

- Climate
- Landforms
- Animals
- Plants

**\*\*\*Think CLAP\*\*\***

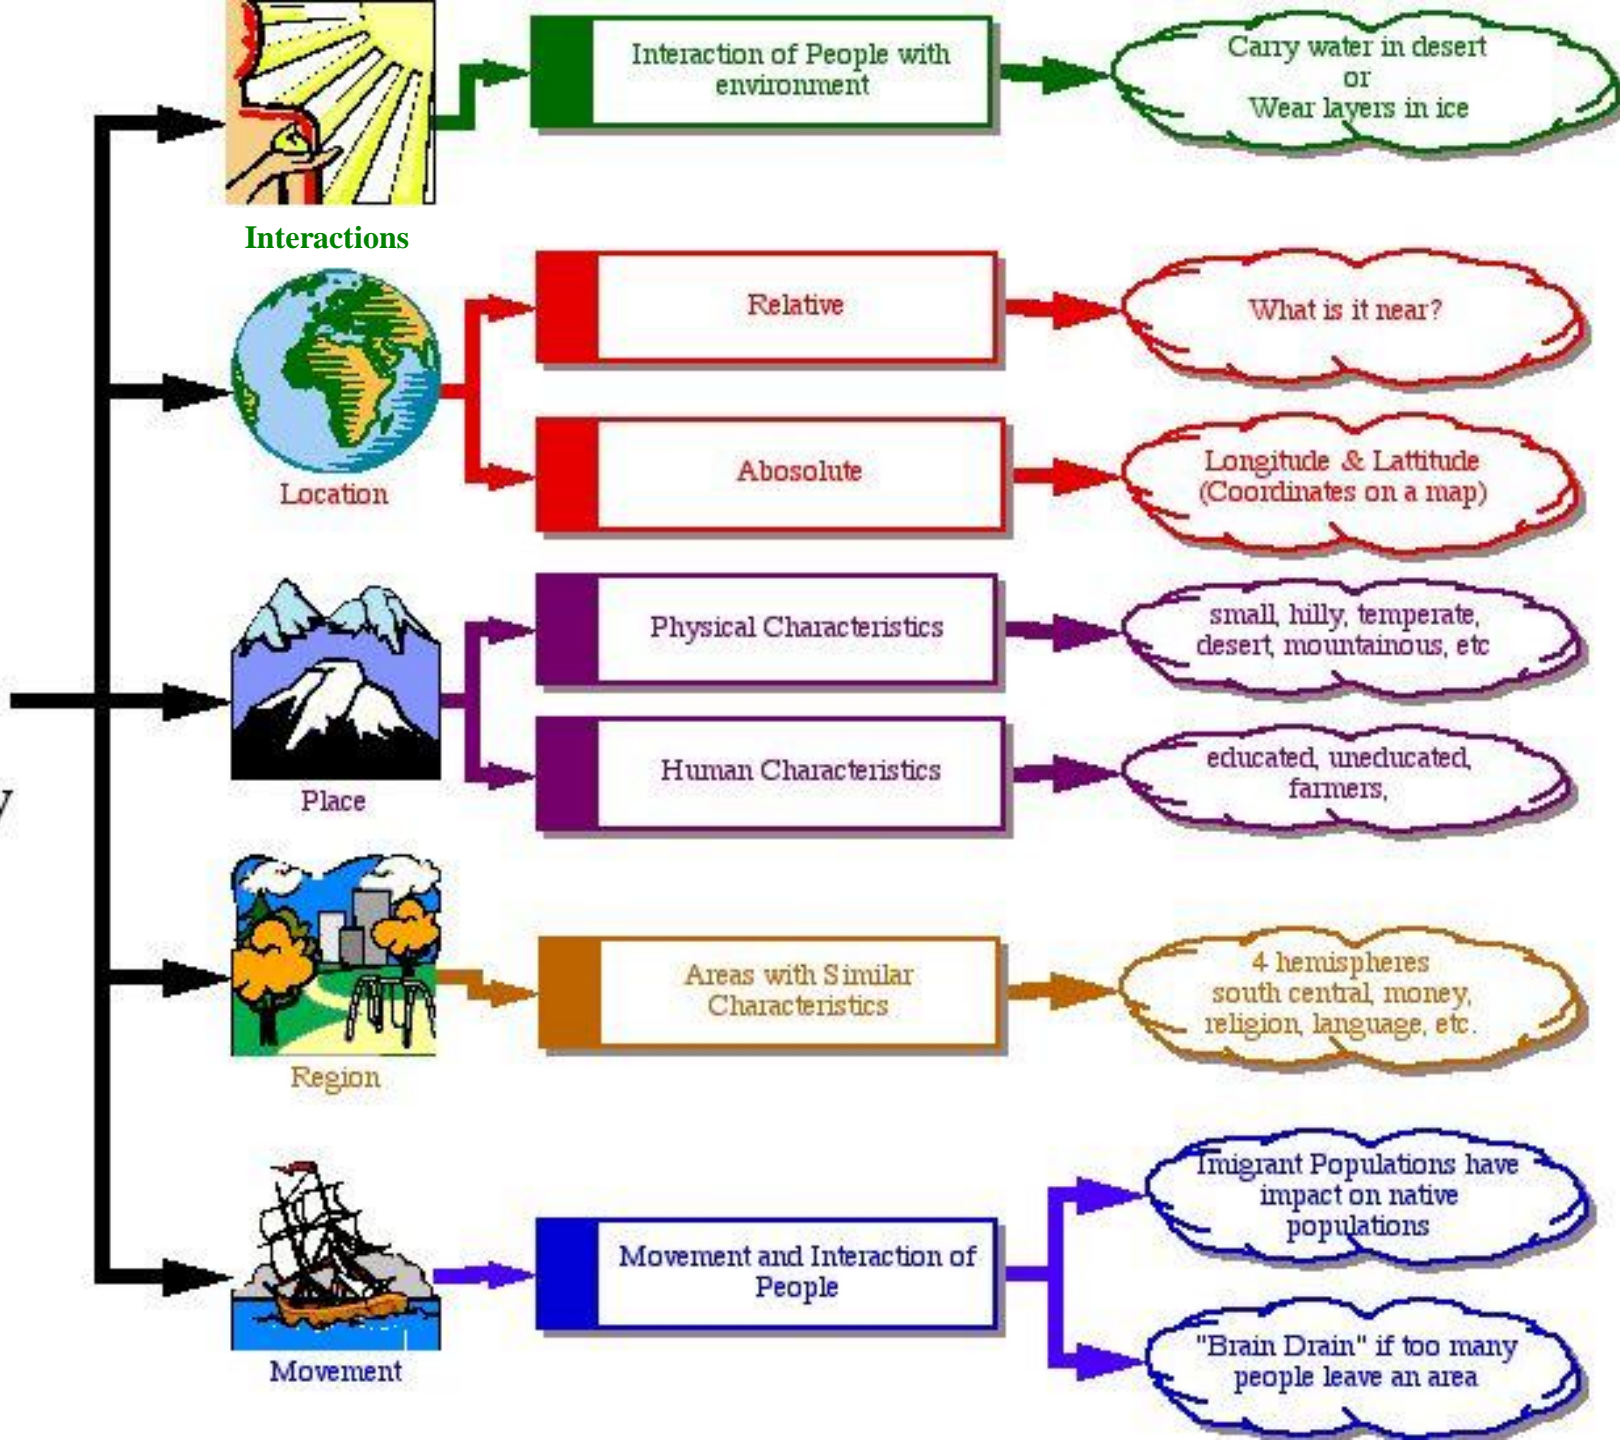

**Human Characteristics:**  
describes people of a place.

Examples: religion, education, customs, and language.
